## Helpful Tips

### Use Google Chrome:
Classroom is optimized for use in the Chrome browser. To get the best experience and utilize browser plug-ins, this is your browser of choice.

### Create Classes for Activities:
You can create classes for activities outside of just the physical classes you teach. Things like bonus assignments, clubs, and organizations, and study groups can all utilize Google Classroom for collaboration.

### Utilize the Mobile App:
Available for both iOS and Android, the Classroom app lets you stay connected any time. App-specific features include digital annotations, push notifications, and the ability to quickly record video instructions.

### Use Consistent Naming Conventions:
Before you start naming classes and assignments, establish a method for keeping names consistent and organizing work in a logical manner. For example, label classes with the term or year, and assign a number value to assignments.

### Use Browser Functions to Locate Students or Work:
Use browser shortcuts to quickly locate what you’re looking for. Press **Ctrl + F** on a PC or **Cmd + F** on a Mac to open the Find search field. Type the student or assignment you’re trying to locate on the page.
