Importing an Image From Your Document Camera to Notebook Software.

You can import your image and edit it using your SMARTBoard! Here’s how:

Make sure your document camera is connected to your computer via the USB connection, and that you have the AverMedia software installed on your computer.

1. Open Notebook Software.

2. Click on Insert – Picture from Scanner

3. Click Scan – note that AverPlus is the default option.
4. Click Snapshop

5. **Click Close** - you can now use your SMARTBoard tools with your document.
